

CONTENTS LOG BOOK

S.NO.	COMPETENCY	PAGE NO.
1	Compound microscope	1
2	Preparation of a peripheral blood smear and determination of differential leukocyte count (dlc) (py 2.11)	4
3	Total leukocyte count (tlc) (py 2.11)	9
4	Determination of total erythrocyte (rbc) count (py 2.11)	13
5	Estimation of haemoglobin (py 2.11)	17
6	Determination of rbc indices (py 2.11)	21
7	Determination of blood groups (a, b, o and rh system) (py 2.11)	23
8	Determination of bleeding time (bt) & clotting time(ct) (py 2.11)	27
9	Determination of esr and pcv (py 2.12)	30
10	Determination of osmotic fragility (py 2.12)	36
11	Determination of reticulocyte count (py 2.13)	40
12	Determination of platelet count (py 2.13)	44
13	Simple muscle twitch (effect of single muscle stimulation)	48
14	Effect of temprature on simple muscle twitch	51
15	Determination of conduction velocity of frog sciatic nerve	53
16	Effect of two successive stimuli (of same strength) on skeletal muscle contraction	56
17	Effect of increasing strength of stimulus on skeletal muscle contraction	60
18	Effect of increasing frequency of stimuli on skeletal muscle contraction (genesis of tetanus)	63
19	Genesis of fatigue in skeletal muscle	66
20	Normal cardiogram and effect of temperature on it	70
21	Properties of cardiac muscles	73
22	Effect of vagus stimulation and white crescentic line on the cardiogram	77
23	Effects of variables on intact frog's heart (acetylcholine, adrenaline, atropine & nicotine)	80
24	Study of human fatigue mosso's ergograph and hand-grip dynamometer (py 3.14)	84
25	Test for cardio-respiratory responses to steady state exercises – harvard step test (py 3.16)	88
26	Clinical examination of the abdomen (py 4.10)	91
27	Examination arterial and venous pulses (py 5.16)	96

28	Measurement of blood pressure and heart rate at rest (py 5.12)	100
29	Effect of posture on blood pressure and heart rate (py 5.12)	103
30	Clinical examination of the cardio-vascular system (py 5.15)	106
31	Effect of exercise on blood pressure and heart rate (py 5.12)	112
32	Recording of 12-lead electro-cardiogram and its interpretation (py 5.13)	115
33	Autonomic function tests (py 5.14)	119
34	Spirometry – study of lung volumes and capacities (py 6.8)	125
35	Clinical examination of the respiratory system (py 6.9)	127
36	Peak expiratory flow rate (py 6.10)	133
37	Clinical examination of the cranial nerves (py 10.11)	135
38	Clinical examination of the higher mental functions (py 10.11)	142
39	Clinical examination of the motor system (py 10.11)	145
40	Reflexes (py 10.11)	150
41	Clinical examination of the sensory system (py 10.11)	154
42	Perimetry & blind spot (py 10.20)	159
43	Accommodation and light reflex (py 10.20)	162
44	Determination of binocular vision & stereoscopic vision (py 10.20)	165
45	Determination of visual acuity (py 10.20)	167
46	Colour vision & colour blindness (py 10.20)	169
47	Clinical examination of the sense of hearing (py 10.20)	173
48	Clinical examination of the smell & taste sensation (py 10.20)	176
49	History taking & general physical examination (py 11.13)	179
50	10 Day yoga programme	183
51	Aetcom	185
52	Early clinical exposure	195
53	Self-directed learning	206
54	BASIC LIFE SUPPORT	241
55	REFRACTIVE ERRORS	245
56	ARTIFICIAL RESPIRATION	251
